WHY CHOOSE US?

Unmatched Experience: As a multidisciplinary consulting firm with over 50 years of combined expertise, we deliver high-quality, customized solutions that elevate your business operations and strategy.

Cyber & Tech Leadership: Our team specializes in cybersecurity, software development, and project management translating your goals into efficient, cost-effective technical solutions using agile methodologies and global development teams.

End-to-End Project Execution: From business requirement development to offshore team management, we ensure every project is aligned with your vision and executed with precision.

Business Beyond Tech: We also offer in-house expertise in real estate investment, franchise operations, government contracting, and foundation development, providing a holistic approach to business growth.

Value-Driven Results: Whether it's property acquisition, investment analysis, or leveraging cloud technologies, we help clients maximize value, reduce risk, and operate more efficiently.

ABOUT US

We are a multidisciplinary consulting firm with over 50 years of combined experience, delivering high-quality, tailored solutions across a wide range of business processes. Our mission is to empower organizations to secure their operations, streamline development, and achieve measurable success.

Our core expertise lies in cybersecurity, software development, and project management including crafting actionable business requirements, applying agile methodologies, and managing offshore development teams to ensure efficient and cost-effective delivery. We translate your vision into technical solutions that drive real results.

Beyond technology, our in-house team brings seasoned expertise in real estate investment and management, government contracting, franchise management, and foundation development. From property acquisition and investment analysis to leveraging cloud technologies, we help clients maximize value, reduce risk, and operate with greater efficiency.

CORE CAPABILITIES

Cybersecurity Solutions

- **Confidentiality:** Ensuring sensitive federal information is accessible only to authorized individuals and entities
- **Integrity:** Protecting the accuracy and completeness of government data from unauthorized alteration or tampering
- **Availability:** Maintaining systems, applications, and data accessibility for authorized users when needed for mission-critical operations

Identity Access Management

- **Authentication:** Verifying user identities through secure methods including multi-factor authentication that meet federal standards
- **Authorization:** Implementing role-based access controls based on the principle of least privilege to protect sensitive government information
- **Auditing:** Continuously tracking access activities with comprehensive logging and regular reviews to ensure compliance with federal requirements

Technology Services

- **Technology Implementations:** Deploying web and server applications efficiently and cost-effectively for federal programs
- **Market Analysis:** Conducting thorough analyses to identify trends and opportunities relevant to agency objectives
- **Financial Projections:** Creating detailed projections to support strategic planning and resource allocation
- **Macro Analysis:** Examining broader economic factors that impact federal programs and operations
